CCTx4 Gel 5000 1.1% Neutral Sodium fluoride instructions

Neutral 1.1% sodium fluoride gel is for adults and children for prevention of caries and hypersensitivity. CT4 gel 5000 contains xylitol and optimal levels of nanoparticle hydroxyapatite at an elevated pH to neutralize decay-causing acids and promote remineralization.

Use twice daily as your normal toothpaste or as directed. Apply a small amount of gel to toothbrush and brush thoroughly on all tooth surfaces for about one minute. Adults expectorate gel after use and for best results do not eat, drink or rinse for 30 minutes. Adolescent patients, ages 6-17, expectorate after use and rinse mouth thoroughly. Instruct children under 12 to minimized swallowing. Supervise children as necessary until capable of using without supervision. Children under 6 years of age: consult a dental professional.

Precautions: DO NOT SWALLOW. As with all medications, keep it out of reach of infants and children. Store at controlled room temperature 20-25 degrees C (68-77 degrees F)
